

Press Release

TC Personal ID: Secure e-mails quickly and cheaply

~ TC TrustCenter offers a quick and comfortable service for getting started with secure commercial e-mail communication ~

Hamburg, 21 January 2008 – TC TrustCenter, the specialist for digital certificates and security solutions, opens a new chapter on online security: The Hamburg software house has expanded its product portfolio with the TC Personal ID, an entry level product for secure commercial email correspondence.

“The very high level of demand for our TC Express Certificates, designed for private use, has shown us that our simple and quick service is ideal as an introduction to secure email communications. Due to the extremely high level of acceptance, we made the decision to offer an equivalent product for commercial use”, explained Dr. Rolf Lindemann, Director Product Management at TC TrustCenter.

TC Personal ID is ideal for getting started with secure email communication. The certificate that is issued is based on a class 1 trust level and can be provided for use within a couple of minutes. The TC Personal ID can be applied for quickly and simply: After forwarding the application data via an encrypted connection (SSL), the certificate is issued and can be downloaded immediately. The TC Personal ID only requires only a small amount of identification information. During the application for a TC Personal ID, the TC TrustCenter only checks the validity of the email address provided.

The TC Personal ID is now available for commercial use for the low price of 13.50 Euros for one year, 23.50 Euros for two years or 33.50 Euros for three years.

Only one thing has changed for private customers who enjoy using the TC TrustCenter Express-Certificate. TC Express now has a new name, the TC Internet ID. TC Internet ID is still aimed at people who wish to encrypt and sign their private emails and remains a free service from TC TrustCenter.
